

SAFETY CAGE

Fiberglass Cage Ladder

Many industries require professionals to tie off at an anchor point when working at certain heights. This standard helps keep people safe, but it can be a difficult standard to maintain. The OSHA-compliant Little Giant® Safety Cage® eliminates the need to tie-off, making jobs faster, safer and less expensive than many scaffolding or lift options. The Safety Cage allows one to work hands-free, making it the perfect ladder for jobs like maintaining large HVAC equipment or installing stage lighting.

Easy to use, store and carry

The Safety Cage® helps protect operators from the most common causes of stepladder falls, including standing on the top cap and over-reaching

The Safety Cage® stores in a compact footprint and is easy to store and transport

Ground Cue®

Descend the ladder with confidence knowing you will never miss the bottom rung again with the Ground Cue®. The Ground Cue alerts you with an audible “click” when you’ve reached the last rung on the ladder.

Model	Weight capacity ¹	Highest standing level platform height ²	Stepladder max reach ²	Platform Size	Guardrail Height ²	Storage height ²	Storage width at base	Ladder weight
Safety Cage 6' (19706)	170kg	1.70m	3.68m	53cm x 46cm	1.07m	3.15m	98cm	29.48kg

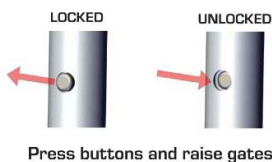

SET UP (IN-USE) POSITION:

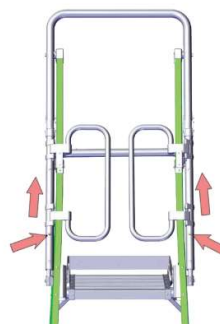

Open until the platform rests securely.
