

Work Platform Instructions

1. Place the wire hooks on the rung below the desired platform height. Place the Work Platform on the rung above the wire hooks. Ensure the Work Platform is securely in position before use.

2. Push the Work Platform forward as shown above. Climb the ladder up to the rung above the platform.

3. Push the Work Platform back with toe until the forward edge of the Work Platform rests securely against the rung. Ensure the Work Platform is securely in position before putting full weight on it.

4. When finished using the Work Platform, step to rung above the Work Platform and push the Work Platform forward with toe. Safely step down through Work Platform.

The Work Platform may be used to stand on or as a tool tray.
